## Description

Flexible 12 mm wide linear LED strip. Available in 10 meter (32.8 feet) rolls that can be cut every 3 LEDs (99 mm or 3.9 in).

The LED Strip lights are manufactured with high-quality materials and designed for professional lighting. Every strip light begins with a heavy-duty dual-core copper printed circuit board (PC Board), it is then soldered with an array of chips and color options. Moreover, the strip lights comes with a strong 3M adhesive backing. You can also purchase our high quality plastic mounting clips for installing LED strips to mount on any rough materials and withstand high temperatures without impairing the brightness of the LED. They can be cut to any size (marked interval points) and rejoined by soldering.
